Price:.... \$25,000.00

Size:..... 12000 SQft City:..... Bahamas State:.... Outside_USA County:... Eleuthera Property Description: Absolutley beautiful residential building lot on the Bahamian Out Island of Eleuthera. Lot size is 95' x 120' and is on a natural bluff overlooking the blue Carribbean Sea. Miles of pristine white sand beach are along both the Atlantic and Carribbean shoreline of this island. The subdivision is zoned and recorded as is the title to the property. Beautiful beach homes are allready built next to and in the general area of the lot. City water and electricity as well as paved roads are in this established beach community with a strong homeowners association. Supplies and shopping are available in nearby Governours Harbour and Gregory Town and the Hatchet Bay Yacht anchorage provides a secure anchorage with a full service marina. The island has 3 airports and is also served by high speed ferry service from Nassau. Construction is very busy on the island and the lot would make an ideal island residence with million dollar ocean view or for investment. Other business opportunities require my selling this property. Please note that the picture shows a similar view to that of the subject property. However there is no house in front of my specific lot to spoil the view as in the attached photo. Additional photos of the specific lot and it's view of the carribbean are available by e-mail.
